Comments: (If possible, please reference section and/or page number in document if applicable.)

It is my feeling that Senator O'Donnell brought forth the most level headed, honest Assessment of the YMP. I agree that the site has been determined and that every effort should be made to ensure transportation safety, minimizing the impact on the environment and to educate and compensate the State of Nevada appropriately. I also believe that every effort should be made to address the recycling issue of the nuclear waste. Big Science created the waste and I am sure our best and brightest can develop means to manage this waste without public hazard.

Please note: For your comment(s) to be considered by the Secretary of Energy before a decision is made whether to recommend the site to the President, your comment(s) need to be received by the U.S. Department of Energy by September 20, 2001. To the extent practicable, the Department will consider comments received after September 20, 2001.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible, then secure with tape.
